[AE911Truth.org](http://AE911Truth.org)

**When:** Saturday, August 18, 2012, 7:00 (MDT), with encore airings on Channel 12.1.

**Live Streaming and Details:** Of special interest, CPT12 will be streaming this important event over the internet through Sunday, September 2, 2012 at: [www.cpt12.org/911ExplosiveEvidence](http://www.cpt12.org/911ExplosiveEvidence). Details of encore airings and public comments can be found at this link.

***9/11: Explosive Evidence: Experts Speak Out:*** This new documentary by Architects and Engineers for 9/11 Truth features dozens of credentialed experts in architecture, engineering, and other related fields who argue that the World Trade Center (WTC) Twin Towers and WTC Building 7 were not brought down on September 11, 2001, by the office fires ignited by the jetliner impacts, but rather by explosive controlled demolition. The 43 architects, engineers, physicists, chemists, and others interviewed in the film represent more than 14,000 concerned citizens and over 1,700 architects and engineers from around the world who have signed a petition demanding a new, independent investigation. The film details scientific, forensic evidence that the group claims was omitted or misrepresented by the official reports. Official reports blame the unprecedented destruction of all three modern skyscrapers on fires and on the removal of insulation by the jetliner impacts. No jetliner crashed into WTC 7.

The documentary presents interviews with several psychologists who share their ideas about why the evidence discussed by the technical experts in the film has been difficult for many to face, and how to make approaching others with this controversial issue easier. Family members of 9/11 victims speak to the viewers explaining why they are still not happy with the answers they've been given by our government. They ask that we join them in looking at what these experts have to say.

**Appearing live in the CPT12 studios:** San Francisco Bay Area architect Richard Gage, AIA, the founder of Architects and Engineers for 9/11 Truth, will join Shari Bernson and Tom Colbert in the CPT12 studios for questions. Gage has recently completed a national tour with this new film. Frances Shure, MA, LPC, one of the psychology professionals in the documentary, will also be an in-studio guest.

**History:** CPT12 is the first US broadcaster and PBS station to air content addressing alternative theories and suppressed news about the events of 9/11. Their US premiere broadcast of *9/11 Press for Truth* in June 2009 was a successful fundraiser but not without controversy. The station received many viewer responses, pro and con, nationally and internationally.

Over the succeeding years, CPT12 aired the documentaries *9/11: Blueprint for Truth* and *Loose Change 9/11: An American Coup*, which were similarly successful in generating pledges and public commentary.

**Mission:** Colorado Public Television is committed to presenting alternative perspectives and to examining information and issues not addressed elsewhere in the mainstream media: [http://www.cpt12.org/about/about\\_us.cfm](http://www.cpt12.org/about/about_us.cfm)
